

## Kids drew drinking fountains to their school

Wastewater collection worker, pipe breakage repair mechanic, pump maintainer and cleaning lady – these water related daily occupations were on kids' drawings, rewarded by inauguration of a drinking fountain in the Szieberth Robert Primary and Elementary Art School at Pécs on Friday. The children "drawn up" the fountain for themselves by TETTYE FORRÁSHÁZ Zrt. Water Day contest: in addition to the announced award offered by the service provider, they donated the school a drinking fountain for their creative and unique creations.

Ilona Tóth, school director and the kids received the decorated Zsolnay drinking fountain installed in the courtyard on the 29 April ceremony. The director said, they are actively involved in the tenders of the service provider and they are very proud that their work was fructifying. – Respectable, as the provider of Pécs pays attention to children. Their program helps young people to become conscious water users by fine arts and drawing tools. It gives us pretty educational opportunities as well – told the director.

– While it may seem according to the drawings arrived for the competition, the most popular water related professions are the diver and the dolphin trainer, there were some others among the many imaginative creations, which were representing some mostly hidden professions in our everyday lives – said Zsolt Sándor CEO, while appreciated the kids' work. - It is important that children are aware of, know, that there are these kind of professions as well. Locally, at Tettye as well, where representatives of many professions work together as background of the water service continuity on a naturally unnoticed way. These blue-collar professions provide secure jobs in long-term – stressed the company's CEO .

The event was rich of special prizes: twelve young artists received gifts which were offered by Dr. Iván Szabó Law Firm, as well as the public utility service provider's partner the Bally Holding Trust Ltd seeing the students' activity and enthusiasm. – On the grounds of our related activities and social commitment we were pleased to join the recognition of these children's creativity. We are confident of inspiring their further creation by these gift packages – emphasized Dr. Iván Szabó, lead attorney of the firm at the ceremony.

The next drinking fountain will be set at Budai Városkapu Primary School, Komlói út, in May. That will be the fifteenth school, community site, where high-quality tap water received worthy environment with the support of Tettye Forrásház.
